WORK EXPERIENCE

Backend and Frontend Developer, Atlantis Gravity (Istanbul, Türkiye) Feb 2023 - Aug 2025

- Developed and maintained fullstack web applications using Node.js and Python, with frontend technologies like React and Next.js. Built RESTful APIs, integrated MongoDB and MySQL, and created responsive user interfaces using HTML, CSS, and Bootstrap.
- Collaborated with team members to deliver features, fix bugs, and improve application performance, contributing to scalable and user-friendly products.
- Maintained monorepo structure, managed dependencies with npm, Yarn, nvm, and utilized GitHub for version control.

FullStack and DevOps Engineer, Digital City IT Center (Tashkent, Uzbekistan) Sep 2025 - Feb 2026

- Developed scalable web applications and AI solutions using TypeScript, Node.js, Python and modern frameworks like NestJS, Express, and FastAPI. Built REST/GraphQL APIs, data Crawling Batching systems and RDBS / NoSQL as MongoDB, MySQL, Prisma, Redis
- Managed deployment and infrastructure using Docker, Nginx, PM2, Shell and Linux. Also built AI and ML/DL solutions using PyTorch, OpenCV, and integrated modern AI APIs Codex, Claude, Gemini.
